ART Unit 2172

Art Unit: 2172

DETAILED ACTION

1. This office action is in response to the application filed February 28, 2002, in which claims 1-68 are presented for examination.

Information Disclosure Statement

2. The information disclosure statement filed February 2, 2004 complies with the provisions of 37 CFR 1.97 and MPEP § 609. It has been placed in the application file. The information referred to therein has been considered as to the merits.

Drawings

3. Applicants are required to furnish the formal drawings in response this office action. No new matter may be introduced in the required drawing. Failure to timely submit a drawing will result in **ABANDONMENT** of the application.

Claim Rejections - 35 USC § 103

4. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

5. This application currently names joint inventors. In considering patentability of the claims under 35 U.S.C. 103(a), the examiner presumes that the subject matter of the various claims was commonly owned at the time any inventions covered therein were made absent any

Art Unit: 2172

evidence to the contrary. Applicant is advised of the obligation under 37 CFR 1.56 to point out the inventor and invention dates of each claim that was not commonly owned at the time a later invention was made in order for the examiner to consider the applicability of 35 U.S.C. 103(c) and potential 35 U.S.C. 102(e), (f) or (g) prior art under 35 U.S.C. 103(a).

6. Claims 1, 4-5, 8-13, 16-17, 20-22, 27, 32, 33, 36, 37, 40-44, 48, 50-58, 62-63 and 67-68 are rejected under 35 U.S.C. 103(a) as being unpatentable over Chow et al., (hereinafter "Chow") US Patent no. 5,875,334.

As to claim 1, Chow discloses the claimed "receiving a database statement from a client " by means of receive a query statement from a user (col.1, lines 63-67); and "searching memory for a similar database statement" by comparing the SQL3 control statements (col.2, lines 25-29; col.10, lines 54-67), wherein the REPEAT statements is similar to WHILE statements (col.12, lines 23-48). Chow does not explicitly disclose the use of reusing a data structure compiled for said similar database statement to execute said database statement when a system parameter is configured to control data structure sharing. However, Chow discloses a V2 compiler, where the declaration and reference of a cursor is processed in a way which involves the collaboration between the pre-processor and SQL compiler is setup to control data structure sharing (col.7, lines 50-67; col.32, lines 4-15; col.42, lines 13-52). Therefore, it would have been obvious to one having ordinary skill in the art at the time the invention was made to modify Show's system wherein the plan optimizer, provided therein (items 116 of fig.1) would incorporate the use of reusing a data structure compiled for said similar database statement to execute said database statement when a system parameter is configured to control data structure sharing because that

Art Unit: 2172

would provide Chow's system the enhanced capability of compiling query statements and control statements while still enabling and enhancing the efficiency of the system.

As to claim 4, Chow discloses the claimed "wherein reusing a data structure compiled for said similar database statement occurs when a command line parameter is configured to control data structure sharing" (col.6, lines 25-36; col.23, lines 36-67).

As to claim 5, Chow discloses the claimed "wherein the command line parameter is a hint for enabling a one-time system parameter override" (col.7, lines 50-67).

As to claim 8, Chow discloses the claimed "returning a result set to the client if said database statement is a query" (col.39, lines 35-45).

As to claim 9, Chow discloses the claimed "wherein reusing a data structure includes executing the execution plan compiled from said similar database statement" (col.23, lines 35-65).

As to claim 10, Chow discloses the claimed "wherein said data structure a cursor" (col.42, lines 14-34).

As to claim 11, Chow discloses the claimed "wherein said database statement and said similar database statement are SQL statement" (col.23, lines 35-65).

Art Unit: 2172

As to claims 12-13, 16-17 and 20-21, the limitations of claims 12-13, 16-17 and 20-21 have been mentioned in the rejection of claims 1, 4-5 and 8-11 above. They are therefore, rejected under the same rationale.

As to claims 22, 27, 32-33, 36-37 and 40-43, the limitations of claims 22, 27, 32-33, 36-37 and 40-43 have been mentioned in the rejection of claims 1, 4 and 8-11 above. They are therefore, rejected under the same rationale.

As to claims 44, 48 and 50-57, the limitations of claims 44, 48 and 50-57 have been mentioned in the rejection of claims 1, 4 and 8-11 above. They are therefore, rejected under the same rationale. In addition, Chow discloses the claimed “a parser for hard parsing the database statement” (col.); “building an expression tree from the database” (col.); and “a syntactic analyzer” (col.7, line 66-col.8, line 7).

As to claims 58, 62 and 67-68, the limitations of claims 58, 62 and 67-68 have been mentioned in the rejection of claims 1, 4 and 8-11 above. They are therefore, rejected under the same rationale.

Allowable Subject Matter

7. Claims 2-3, 6-7, 14-15, 18-19, 23-26, 28-31, 34-35, 38-39, 45-47, 49, 59-61 and 64-66 are objected to as being dependent upon a rejected base claim, but would be allowable if

Art Unit: 2172

rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Conclusion

8. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Jean M. Corrielus whose telephone number is (703) 306-3035. The examiner can normally be reached on Monday - Friday (12:00pm - 7:30 pm).
